DETAILED ACTION

Examiner's Note

1. The Examiner has tried to contact applicants' sole representative of record, namely (Russell Gross), via telephone on July 5, 2007 to resolve the 35 USC 112 issues. The Examiner was unable to resolve the issues because Mr. Gross no longer represents the applicants' in the instant application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 26 is rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. "representation of a volume of interest located within a multi-dimensional data set" is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). The volume of interest is not provided directly as a single data. It is portion of the data located within the three-dimensional data set as illustrated in Figure 4 of the drawings.

Since claims 27-32 directly or indirectly depend on claim 26, they are also rejected under U.S.C. 112, first paragraph, for the same reason set forth above for claim 26.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1 and are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as

Art Unit: 2624

the invention. Claim 1 recites the limitation “. . . generate a face plate, . . . applying the face plate to the multi-dimensional data set”. It is unclear whether the generated faceplate or associating a set of pixels with a faceplate is defined as a function or information of the structure of interest. Does the system automatically knows what kind of information is the face plate comprised of? It is also unclear what is being accomplished by applying the faceplate to the multi-dimensional data set. Likewise, a similar or analogous variation of this feature also occurs in claims 13, 21, and 26. Please clarify.

Since claims 2-12, 14-20, 22-25, and 27-32 depend on claims 1, 13, 21, and 26 respectively, they are also rejected under 35 U.S.C. 112, second paragraph, for the same reason set forth above for claims 1, 13, 21, and 26.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
